

AVA

Ava is a table system with meeting tables, conference tables and rectangular side tables/workspaces. It comes in two heights of 730 mm or 870 mm. There are numerous practical accessories: a cover with magnetic catch to conceal electrical and computer sockets, a magnetic cable conduit that attaches to the leg to conceal cables, and a cable basket that keeps cables tidy underneath the table top. These intelligent solutions make the Ava table system unique – as do its shape and choice of materials.
